

Heartland Regulatory and Public Consultation Process

FACILITY APPLICATION DEVELOPMENT

The Transmission Facility Owners (TFO) carry out the public consultation, environmental work and the route and site selection.

The TFOs file a Facility Application with the AUC.

REGULATORY APPROVAL PROCESS

The *Electric Statutes Amendment Act, 2009* designates the Heartland Project as “critical transmission infrastructure” (CTI).

AUC proceeding on Facility Application.

AUC decision on Facility Application.

TFOs begin facility construction if the AUC approves the Facility Application.

PUBLIC CONSULTATION*

*Public Consultation is a continuous process that occurs throughout the regulatory approvals and construction (if approved) phases of the project.
